👤 PROFILE

During high school and university, I acquired diverse skills and participated in several web development projects. These experiences helped me become proficient in React, Vue, and Node.js. After graduating, I continued to enhance my skills by completing various projects. I am now seeking a position that allows me to utilize my abilities to the fullest while enriching my experience. My goal is to deliver high-quality work that builds trust with my clients.

🎓 EDUCATION

Bachelor's Degree
Technical University of Munich
Munich, Germany

✪ PASSION

Website & application Development

Mobile Development

AI Development

💼 PROFESSIONAL EXPERIENCE

Full Stack Developer
06/2023 – present | Munich, Germany
As a Full Stack Developer, Developed and implemented a variety of applications, including an AI-powered SEO article generator with MongoDB, Next.js, and Nest.js; a user-friendly wine services platform for VinPro using Nuxt.js and MySQL; an engaging Telegram bot leveraging the MERN stack for mini-games and lottery claims; and a DNA Blueprint Analyzer web app that combines Next.js, Tailwind CSS, and Python Flask to explore genetic information.

Frontend Developer
11/2022 – 06/2023 | Munich, Germany
As a Front-End Developer, Developed over 10 landing pages and applications, including a real estate website using Next.js, TypeScript, and Tailwind CSS; a SaaS landing page that enhanced my skills in Figma design and advanced animations with Framer Motion and Magic UI; a modern landing page for generative AI products featuring sleek, interactive elements; and a privacy-focused real estate site in Japan developed with PHP for the homepage and WordPress for the search page.
